The Regulator

Dear Dr Smith,

**Annual Report for DIR 108, for the year 2 December 2012
to 1 December 2013**

I refer to the requirements of the above licence (*viz.* general conditions 16 to 19), to provide the OGTR with an annual report within 90 days of the anniversary of the issue date of this licence.

During the period 2 December 2012 to 1 December 2013, no intentional commercial activities were undertaken with InVigor® Hybrid x Roundup Ready® canola in Australia. During this period a total of three research and innovation winter trial sites, totalling 3 ha were planted in Victoria and NSW, and 3 ha of summer trial sites were planted in Victoria and South Australia.

During this reporting period, no adverse effects of InVigor® Hybrid x Roundup Ready® canola were observed at any of the DIR108 trial sites. Furthermore, no unexpected adverse effects were reported to us as a result of dealings licensed by DIR108.

Yours sincerely,
Bayer CropScience
