## **1. General Conditions**

### **a. Informing people of their obligations**

Monsanto Australia Limited informed all cotton growers and cotton gins covered by the DIR 012 / 2002 licence of the obligations imposed on them as a result of the conditions of these licences. This was achieved primarily through Monsanto Accreditation programs and information courses and mail outs.

Bollgard II<sup>®</sup> cotton Accreditation programs require all persons having management responsibility for Bollgard II crops to undergo training and pass a test on the content of the training. Growers were only required to attend these courses and pass the accreditation test once.

Gins known to transport cotton seed into the restricted zone were notified by letter that they were permitted to transport seed north of 22° south provided they adhered to all conditions and obligations associated with the use of cotton seed within the restricted zone.

### **b. Reporting**

During the reporting period, the licence holder did not become aware of any additional information as to any risks to the health and safety of people, or to the environment, associated with the dealings authorised by the licence, or of any unintended effects of the dealings authorised by the licence.

### **c. Material changes in circumstances**

During the 2004/05 reporting period, Monsanto Australia Limited did not become aware of any relevant conviction of the licence holder occurring after the commencement of this licence; any revocation or suspension of a licence or permit held by Monsanto Australia Limited; or any event or circumstance that would affect the capacity of Monsanto Australia Limited to meet the conditions of the DIR 012 licence.

### **d. Remaining an accredited organisation**

At all times, Monsanto Australia Limited remained an accredited organisation and complied with conditions of accreditation as set out in the OGTR Guidelines for Accreditation of Organisations.

### **e. Changes to details**

During the 2004/05 reporting period, there were no changes to contact details of the Project Supervisor.

### **f. Testing methodology**

Under conditions of the licence, Monsanto Australia Limited was required to provide the Regulator with a method capable of reliably detecting the presence of the GMO. This advice was emailed to Deborah Maguire and Neil Ellis of the OGTR on 15 October 2002.

## **2. Release of Bollgard II® south of latitude 22° south (outside the Restricted Zone)**

*The licence holder may conduct dealings with the GMOs south of latitude 22 degrees south.*

In the 2004/05 reporting period, Bollgard II cotton was grown in the traditional cotton-growing regions south of latitude 22° south in NSW and Queensland. More information on the locations where all Bollgard II cotton crops were grown during the 2004/05 cotton growing season are given in **Part 2a**.

### **a. Crop plantings of Bollgard II® cotton**

#### **i) Conditions for Growing Crop**

Sales and planting of Bollgard II were undertaken under a Technology User Agreement (TUA), which sets out the conditions for planting and growing a cotton crop containing Bollgard II technology. In order to be eligible to sign such an agreement, a grower was required to attend a Bollgard II accreditation program, and pass a test based on the material covered in the accreditation program.

CONFIDENTIAL

Vertical text along the right edge of the page, likely from a binder or margin, including the words "REDACTED" and "CONFIDENTIAL" repeated vertically.

[Illegible text in the left margin]
