Subject: RE: Annual reporting under OGTR Licences held by Bayer [SEC=UNCLASSIFIED]

47F

Hello Peter,

I apologise for taking a little while to collect the information on DIR021/2002 and DIR108, however I can now provide the information below.

For DIR021/2002 for period 26th July 2016 to 25th July 2017 the following number of hectares were planted in the following States
Victoria 17.5 ha; SA 37.5 ha; NSW 4 ha; WA 12 ha. All of the plantings were research based (managed by Bayer).

For DIR108 for period 3rd December 2015 to 2nd December 2016 the following number of hectares were planted in the following States
Victoria 0.25 ha. All of the plantings were research based (managed by Bayer).

No adverse impacts or unintended effects have been observed from the GMOs approved under these Licences during this reporting period.

I am happy to discuss the idea of supply of Annual reports to OGTR in a manner which may be published on the OGTR website. If you could give me an idea of when is a good time to discuss, and provide your direct line number, then I can give a call about it once I have consulted internally about the proposal.

Best regards,

[REDACTED], Seeds, Australia and New Zealand
